

General description

Hydroseal® Canada 22 CALLIBRE CLEANER is a clear, low VOC emission, water-thin, solvent cleaner. It is specifically formulated to remove grease, oil and dirt from the bonding surfaces of PVC, CPVC, ABS and Styrene tube and fittings. It is approved for Flowquard Gold® CTS plumbing systems.

Application

Hydroseal® Canada 22 CALLIBRE CLEANER is an all purpose cleaner and can be used on all sizes, classes and schedules of PVC, CPVC, ABS and Styrene tube and fittings. It must be used only as a cleaner, in conjunction with the appropriate primer and/or cement combination. Hydroseal® Canada 22 CALLIBRE CLEANER can also be used as a brush cleaner.

Detailed directions on making solvent cemented joints are printed on the container label. An installation DVD/CD covering solvent cementing is available. It not only describes the basic principles of solvent cementing, but also covers the handling, storage and use of our products. It is highly recommended that the installer review the instructions supplied by the tube and fitting manufacturer.

Standards and certification listings

- Meets SCAOMD Rule 1168/316A.
- Compliant with LEED® (Leadership in Energy and Environmental Design). When using this Hydroseal® Canada low VOC product, credit can beclaimed for LEED Green Building Rating System - Indoor Environmental Quality.

Directions for use

- Before using this cleaner, tube and fittings should be cut square, deburred and checked for proper fit.
- Use an applicator (e.g. dauber, brush top applicator or paintbrush) at least ½ the size of the tube diameter. Do not use a rag as repeated contact of cleaner-infused rag with skin may cause irritation or blistering.
- Apply 22 CALLIBRE CLEANER freely to the socket keeping surface wet and applicator wet and in motion for 5 15 seconds. Be sure to use a scrubbing motion to clean off all grease, oil and dirt. Re-dip if necessary. Avoid puddling the socket.
- Apply 22 CALLIBRE CLEANER to the tube surface in the same manner equal to the depth of the socket.
- Repeat Application to the fitting socket.
- Allow 22 CALLIBRE CLEANER to dry and then apply appropriate Hydroseal[®] Canada primer and/or cement following instructions on the cans.

Quality assurance

Hydroseal@ Canada's 22 CALLIBRE CLEANER is carefully evaluated to assure that consistent high quality is maintained. Fourier transform infrared spectroscopy. gas chromatography, and additional in depth testing ensures each batch is manufactured to exacting standards. A batch identification code is stamped on each can and assures traceability of all materials and processes used in manufacturing this product. The date code of manufacture is stamped on the bottom of the container. Stability of the product is limited by the evaporation of the solvent when the container is opened and not contaminated. Adding of solvents is not recommended and may significantly change the properties of the cleaner.

All of the constituents of this adhesive product are listed on the TSCA inventory of chemical substances maintained by the US EPA, or are exempt from that listing. * Indicates this chemical is subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (40CFR3 72). # indicates that this chemical is found on Proposition 65's List of chemicals known to the State of California to cause cancer or reproductive toxicity.

SECTION 4 - FIRST AID MEASURES

Contact with eves: Flush eyes immediately with plenty of water for 15 minutes and seek medical advice immediately.

Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water. If irritation develops, seek medical advice. Skin contact: Remove to fresh air. If breathing is stopped, give artificial respiration. If breathing is difficult, give oxygen. Seek medical advice. Inhalation: Rinse mouth with water. Give 1 or 2 glasses of water or milk to dilute. Do not induce vomiting. Seek medical advice immediately. Ingestion:

SECTION 5 - FIREFIGHTING MEASURES

HMIS NFPA 0-Minimal Dry chemical powder, carbon dioxide gas, foam, Halon, water fog. Suitable Extinguishing Media: Health 1-Slight **Unsuitable Extinguishing Media:** Water spray or stream. Exposure Hazards: Inhalation and dermal contact Flammability 3 3 2-Moderate . Combustion Products: Oxides of carbon and smoke Reactivity 0 0 3-Serious PPE В 4-Severe **Protection for Firefighters:** Self-contained breathing apparatus or full-face positive pressure airline masks.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions: Keep away from heat, sparks and open flame.

Provide sufficient ventilation, use explosion-proof exhaust ventilation equipment or wear suitable respiratory protective equipment.

Prevent contact with skin or eyes (see section 8).

Environmental Precautions: Prevent product or liquids contaminated with product from entering sewers, drains, soil or open water course

Methods for Cleaning up: Clean up with sand or other inert absorbent material. Transfer to a closable steel vessel.

Materials not to be used for clean up: Aluminum or plastic containers

SECTION 7 - HANDLING AND STORAGE

Handling: Avoid breathing of vapor, avoid contact with eyes, skin and clothing.

Keep away from ignition sources, use only electrically grounded handling equipment and ensure adequate ventilation/fume exhaust hoods.

Do not eat, drink or smoke while handling. Store in ventilated room or shade below 44°C (110°F) and away from direct sunlight.

Keep away from ignition sources and incompatible materials: caustics, ammonia, inorganic acids, chlorinated compounds, strong oxidizers and isocyanates.

Follow all precautionary information on container label, product bulletins and solvent cementing literature.

SECTION 8 - PRECAUTIONS TO CONTROL EXPOSURE / PERSONAL PROTECTION

EXPOSURE LIMITS:	Component	ACGIH TLV	ACGIH STEL	OSHA PEL	OSHA STEL
	Methyl Ethyl Ketone (MEK)	200 ppm	300 ppm	200 ppm	
	Cyclohexanone	20 ppm	50 ppm	50 ppm	
	Acetone	500 ppm	750 ppm	1000 ppm	

Engineering Controls: Use local exhaust as needed

Monitoring: Maintain breathing zone airborne concentrations below exposure limits.

Personal Protective Equipment (PPE):

Storage:

Eye Protection: Avoid contact with eyes, wear splash-proof chemical goggles, face shield, safety glasses (spectacles) with brow guards and side shields,

etc. as may be appropriate for the exposure. Prevent contact with the skin as much as possible. Butyl rubber gloves should be used for frequent immersion.

Skin Protection: Use of solvent-resistant gloves or solvent-resistant barrier cream should provide adequate protection when normal adhesive application

practices and procedures are used for making structural bonds.

Respiratory Protection: Prevent inhalation of the solvents. Use in a well-ventilated room. Open doors and/or windows to ensure airflow and air changes.

Use local exhaust ventilation to remove airborne contaminants from employee breathing zone and to keep contaminants below levels listed above. With normal use, the Exposure Limit Value will not usually be reached.

When limits approached, use respiratory protection equipment.

Other Data: Viscosity: Water-thin

SECTION 10 - STABILITY AND REACTIVITY

Stability: Stable

Hazardous decomposition products: None in normal use. When forced to burn, this product gives off oxides of carbon and smoke.

Keep away from heat, sparks, open flame and other ignition sources. Conditions to avoid:

Incompatible Materials: Oxidizers, strong acids and bases, amines, ammonia

SECTION 11 - TOXICOLOGICAL INFORMATION

Likely Routes of Exposure: Acute symptoms and effects:

Inhalation, Eve and Skin Contact

Inhalation: Severe overexposure may result in nausea, dizziness, headache. Can cause drowsiness, irritation of eyes and nasal passages. Eye Contact: Vapors slightly uncomfortable. Overexposure may result in severe eye injury with corneal or conjunctival inflammation on contact with the liquid.

Skin Contact: Liquid contact may remove natural skin oils resulting in skin irritation. Dermatitis may occur with prolonged contact.

Ingestion: May cause nausea, vomiting, diarrhea and mental sluggishness.

Chronic (long-term) effects: None known to humans
