
General description

Hydroseal® Canada 40 CALLIBRE TAIFUN PVC CEMENT is a blue, heavy bodied, extremely fast setting, high strength PVC solvent cement. It is especially formulated for plumbing, industrial, pool and irrigation requirements in all classes and schedules with interference fit through 8 inch diameter. The cement is blue in colour to clearly distinguish it from other solvents.

Application

Hydroseal® Canada 40 CALLIBRE TAIFUN PVC CEMENT, can be used on all types of PVC systems. It is used for irrigation sprinklers, plumbing, pool and spa Applications etc. For pressure systems, it is always best to use cement specifically formulated for the type of plastic tube being used.

Detailed instructions on making solvent cemented joints are printed on the container label. An installation DVD/CD covering solvent cementing is available. It not only describes the basic principles of solvent cementing but also covers the handling, storage, and use of our products. It is highly recommended that the installer review the instructions supplied by the tube and fitting manufacturer.

Notes:
Hydroseal® Canada solvent cements must never be used in a PVC system using or being tested by compressed air or gases; including air-over-water booster.

Shelf life

3 years in tightly sealed containers. The date code of manufacture is stamped on the bottom of the container. Stability of the product is limited by the evaporation of the solvent when the container is opened. Evaporation of solvent will cause the cement to thicken and reduce its effectiveness. Adding of thinners to change viscosity is not recommended and may significantly change the properties of the cement.

Quality assurance

Hydroseal® Canada 40 CALLIBRE TAIFUN PVC CEMENT is carefully evaluated to assure that consistent high quality is maintained. Fourier transform infrared spectroscopy, gas chromatography, and additional in depth testing ensures each batch is manufactured to exacting standards. A batch identification code is stamped on each can and assures traceability of all materials and processes used in manufacturing this solvent cement.
